Pune, India

Summary

UX and Product Designer with nearly 3 years of experience designing complex B2B and enterprise workflows across wealth management, master data management, vendor risk and workforce operations. Works from discovery through delivery, translating user and business needs into clear information architecture, interaction flows, prototypes and design systems. Partners with product owners, engineering, business analysis, QA and client teams to simplify data-rich experiences. Advanced Figma practice, component and variant design, accessibility awareness, and hands-on usability testing.

Professional Experience

Starlfinx Fintech EST | **UX Designer** Dubai (Remote) — Mar 2026 - Present

Projects

FinSight | Wealth Management Intelligence

- AI-enabled wealth management platform that helps financial professionals research advisors and institutions.
- Designed advisor and institution profile experiences, organizing information into clear, data-rich views to support research and decision-making.
- A specific FinSight feature was licensed to BlackRock and later implemented in its Aladdin software.

BirdzAI | Master Data Management

- AI-powered master data management platform for enterprise data and developer workflows.
- Established foundational design elements and reusable components as an independent designer, then translated PRD and FRD requirements into screens and prototypes. Simplified complex flows with input from engineering, business analysis, and stakeholders.
- Designed the System Administration, Developer Platform, and Security Object Definition modules. The product is live.

TPRM | Third-Party Risk Management

- Enterprise software for vendor onboarding and third-party risk management.
- Collaborated with a three-designer team to design the product from scratch, developing workflows feature by feature.
- Worked on vendor onboarding, questionnaires, assessments, engagements, mitigation tasks, contracts, reporting, and administration. The product is live.

Worklynk | Employee and Workforce Management

- Workforce management software for HR teams, organization leaders, and employees.
- Collaborated with a three-designer team to shape workflows around an organization's policies and workforce needs.
- Designed employee and department management, project assignments, and activity and time-tracking wo
